

# FLOW SAFE EQUIPMENT CC

## CONVOLUTED AND BRAIDED STAINLESS STEEL HOSE

Manufactured in stainless steel to suit a wide range of industrial products

It is available in a range of sizes from 6mm to 250mm internal diameter, and in Double, Single or unbraided versions dependant on application

Operating temperatures between minus 200°C and 600°C

It has good crush, corrosion and penetration resistance

The type of hose is subject to temperature, product, bending and the environment
