

FLOW SAFE EQUIPMENT CC

VALVES

One of our specialist valves are shown below. These are imported on demand due to their specialty.

Apollo Ball Valve with “Dead Man Spring Return Handle”

Available in stainless steel, bronze and steel and fitted with RTFE seats.

Commonly used as a sampling valve where the risks of leaving a valve open cannot be tolerated.

Can be supplied as spring return to Open Position OR Closed position

Blow out proof stem design

Supplied as standard with graphite stem packing for aviation use

Available from 1/4" to 2"
