## SECURITY SEALS

A wide range of security seals can be supplied for most applications. Those shown below are a small example. The range available varies from plain wire with lead seals to hi-tech sealing systems. Please contact us for more information.

	<p>Comprising a wire cable, 3mm dia, which is pushed through a seal block. Requires cable cutters to break. Can be supplied with your name, subject to quantity required, and is serially numbered</p>
<p>This polypropylene seal has a fixed length. The insert is welded and will show signs of tampering. It is serialized and can have a name embossed on it, subject to quantity required</p>	
	<p>A plastic pull through type seal, fitted with a metal insert for improved security. Can be sequentially numbered</p>
<p>A cost effective, high security seal. Combines the strength of 4.5mm diameter cable with the performance and reliability of a "bolt locking case"</p>
