

# FLOW SAFE EQUIPMENT CC

## PRODUCT PUMPS

The GD Drum range of product pumps is designed to fit within the truck chassis for PTO drive where possible. Optional drives are hydraulic, electric and diesel/petrol engine

The Mercury 3 is a helical gear pump designed to handle oil based products. It has also been used on bitumen with success. It has multiple mounting positions and has a **BUILT IN RELIEF VALVE**

The SSC 150 Pump is engineered for transfer of chemical and pharmaceutical products. It has high corrosion resistance and the “quick strip” design as shown promotes ease of maintenance.

The FP 2000 is designed for liquid **FOOD GRADE PRODUCTS** and is of stainless steel construction with a “quick strip” design for easy cleaning as shown with the SSC150
